# How to make a github pages portfolio

1) Login at github.com and create a new project.
   Note: You may need to sign up first.

2) On the Create a new repository page name your repository with <your username>.github.io, check the "Initialize this repository with a readme" check box and click "Create Repository." Note: Github uses project and repository interchangeably.
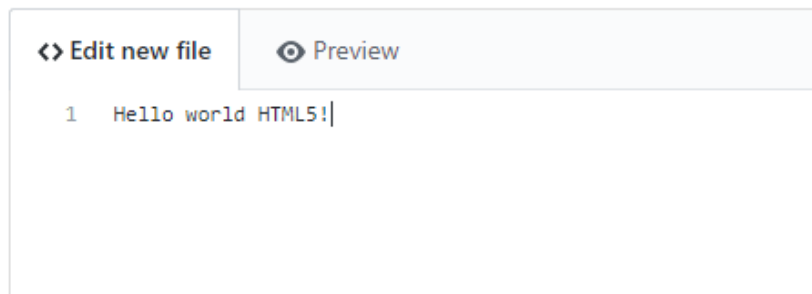

3) Click to "Create new File"

branch   ♡ 0 releases   👥 1 contributor

                        Create new file   Upload files   Find file   Clone or download ▾

                                                    Latest commit 46cb1e2 2 minutes ago

        Initial commit   2 minutes ago

4) Name your file index.html and put some content inside.

rhildred .github.io / [index.html]   or cancel
